## Security Audit Report

Audit prepared for  
**Yonda**

Completed on  
**June , 2025**

@SPYWOLFNETWORK

@SPYWOLFNETWORK

SPYWOLF.CO

# KEY RESULTS

<b>Cannot mint new tokens</b>	<b>Passed</b>
<b>Cannot pause trading (honeypot)</b>	<b>Passed</b>
<b>Cannot blacklist an address</b>	<b>Passed</b>
<b>Cannot raise taxes over 25%?</b>	<b>Passed</b>
<b>No proxy contract detected</b>	<b>Passed</b>
<b>Not required to enable trading</b>	<b>Passed</b>
<b>No hidden ownership</b>	<b>Passed</b>
<b>Cannot change the router</b>	<b>Passed</b>
<b>No cooldown feature found</b>	<b>Passed</b>
<b>Bot protection delay is lower than 5 blocks</b>	<b>Passed</b>
<b>Cannot set max tx amount below 0.05% of total supply</b>	<b>Passed</b>
<b>The contract cannot be self-destructed by owner</b>	<b>Passed</b>

For a more detailed and thorough examination of the heightened risks, refer to the subsequent parts of the report.

# OVERVIEW

This goal of this report is to review the main aspects of the project to help investors make an informative decision during their research process.

You will find a summarized review of the following key points:

- ✓ Contract's source code
- ✓ Owners' wallets
- ✓ Tokenomics
- ✓ Team transparency and goals
- ✓ Website's age, code, security and UX
- ✓ Whitepaper and roadmap
- ✓ Social media & online presence

“

*The results of this audit are purely based on the team's evaluation and does not guarantee nor reflect the projects outcome and goal*

”

# YONDA

## PROJECT DESCRIPTION

"YONDA is more than just a token — it's the economic engine and governance backbone of a fully open, user-first productivity environment. Built with scalability, transparency, and long-term sustainability in mind, YONDA allows anyone to contribute, earn, and shape the platform's future."

**Release Date:** Presale started on their website

**Category:** Token

# CONTRACT INFO

Token Name  
Yonda

Symbol  
YONDA

Contract Address  
N/A

Network  
Ethereum

Language  
Solidity

Deployment Date  
June 02, 2025

Contract Type  
Token

Total Supply  
100,000,000 YONDA

Status  
Presale

## TAXES

Buy Tax  
**0%**

Sell Tax  
**0%**

## Our Contract Review Process

The contract review process pays special attention to the following:

- ✓ Testing the smart contracts against both common and uncommon vulnerabilities
- ✓ Assessing the codebase to ensure compliance with current best practices and industry standards.
- ✓ Ensuring contract logic meets the specifications and intentions of the client.
- ✓ Cross referencing contract structure and implementation against similar smart contracts produced by industry leaders.
- ✓ Thorough line-by-line manual review of the entire codebase by industry experts.

### Blockchain security tools used:

- OpenZeppelin
- Mythril
- Solidity Compiler
- Hardhat

# VULNERABILITY ANALYSIS

ID	Title	
SWC-100	Function Default Visibility	Passed
SWC-101	Integer Overflow and Underflow	Passed
SWC-102	Outdated Compiler Version	Passed
SWC-103	Floating Pragma	Passed
SWC-104	Unchecked Call Return Value	Passed
SWC-105	Unprotected Ether Withdrawal	Passed
SWC-106	Unprotected SELFDESTRUCT Instruction	Passed
SWC-107	Reentrancy	Passed
SWC-108	State Variable Default Visibility	Passed
SWC-109	Uninitialized Storage Pointer	Passed
SWC-110	Assert Violation	Passed
SWC-111	Use of Deprecated Solidity Functions	Passed
SWC-112	Delegatecall to Untrusted Callee	Passed
SWC-113	DoS with Failed Call	Passed
SWC-114	Transaction Order Dependence	Passed
SWC-115	Authorization through tx.origin	Passed
SWC-116	Block values as a proxy for time	Passed
SWC-117	Signature Malleability	Passed
SWC-118	Incorrect Constructor Name	Passed

# VULNERABILITY ANALYSIS

ID	Title	
SWC-119	Shadowing State Variables	Passed
SWC-120	Weak Sources of Randomness from Chain Attributes	Passed
SWC-121	Missing Protection against Signature Replay Attacks	Passed
SWC-122	Lack of Proper Signature Verification	Passed
SWC-123	Requirement Violation	Passed
SWC-124	Write to Arbitrary Storage Location	Passed
SWC-125	Incorrect Inheritance Order	Passed
SWC-126	Insufficient Gas Griefing	Passed
SWC-127	Arbitrary Jump with Function Type Variable	Passed
SWC-128	DoS With Block Gas Limit	Passed
SWC-129	Typographical Error	Passed
SWC-130	Right-To-Left-Override control character (U+202E)	Passed
SWC-131	Presence of unused variables	Passed
SWC-132	Unexpected Ether balance	Passed
SWC-133	Hash Collisions With Multiple Variable Length Arguments	Passed
SWC-134	Message call with hardcoded gas amount	Passed
SWC-135	Code With No Effects	Passed
SWC-136	Unencrypted Private Data On-Chain	Passed

# VULNERABILITY ANALYSIS

## NO ERRORS FOUND

# MANUAL CODE REVIEW

---

When performing smart contract audits, our specialists look for known vulnerabilities as well as logical and access control issues within the code. The exploitation of these issues by malicious actors may cause serious financial damage to projects that failed to get an audit in time.

We categorize these vulnerabilities by 4 different threat levels.

## THREAT LEVELS

### High Risk

---

Issues on this level are critical to the smart contract's performance/functionality and should be fixed before moving to a live environment.

### Medium Risk

---

Issues on this level are critical to the smart contract's performance, functionality and should be fixed before moving to a live environment.

### Low Risk

---

Issues on this level are minor details and warning that can remain unfixed.

### Informational

---

Information level is to offer suggestions for improvement of efficacy or security for features with a risk free factor.

# FOUND THREATS

## High Risk

No high risk-level threats found in this contract.

## Medium Risk

No medium risk-level threats found in this contract.

## Low Risk

No low risk-level threats found in this contract.

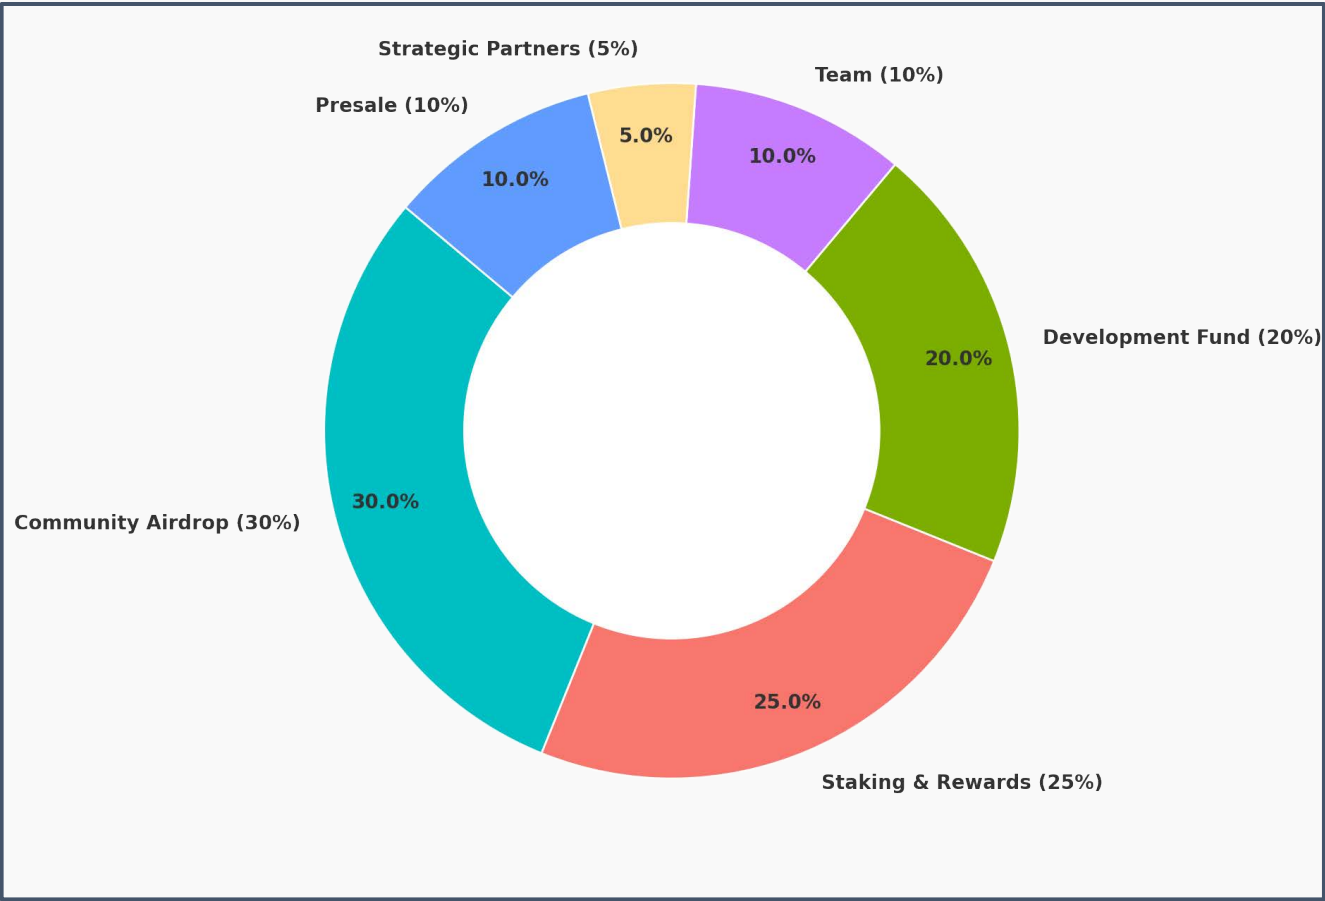

# FOUND THREATS

## Informational

1. **Fixed and Pre-Mined Supply:** The total supply of YONDA is permanently fixed at 100 billion tokens. The entire supply was created ("minted") at the moment of the contract's deployment, and there is no function that allows for the creation of new tokens in the future.
2. **Standard ERC20**  
**Compliance:** The contract is a standard implementation of the ERC20 token standard. This is important because it ensures compatibility with all major Ethereum wallets (like MetaMask, Trust Wallet), decentralized exchanges (DEXs), and other applications within the Ethereum ecosystem.
3. **No Transaction Taxes:** The contract code does not include any "tax" mechanism. This means that when you perform a transfer or a swap on a DEX, the contract itself does not take a percentage fee from the transaction. You will only pay the standard network gas fees.
4. **User-Controlled Token Burning:** The contract includes a public `burn(uint256 amount)` function. This allows any token holder to permanently destroy a portion of their own tokens, effectively removing them from the circulating supply. While the supply cannot increase, it can decrease if users choose to do this.
5. **Standard Ownership Model:** The contract uses the widely-accepted OpenZeppelin `Ownable` module. This provides a clear and standard way to manage contract ownership. The owner can transfer the ownership to a new address but does not have special powers to alter user balances, pause the contract, or change its core logic.

\*The following tokenomics are based on the project's whitepaper and/or website:

TOKENOMICS

# WEBSITE

## Website URL

<https://yonda.us/presale>

## Domain Registry

<http://www.namecheap.com>

## Domain Expiration

2/22/2027

## Technical SEO Test

Passed

## Security Test

Passed. SSL certificate present

## Design

Very nice color scheme and overall layout.

## Content

The information helps new investors understand what the product does right away. No grammar errors found.

## Whitepaper

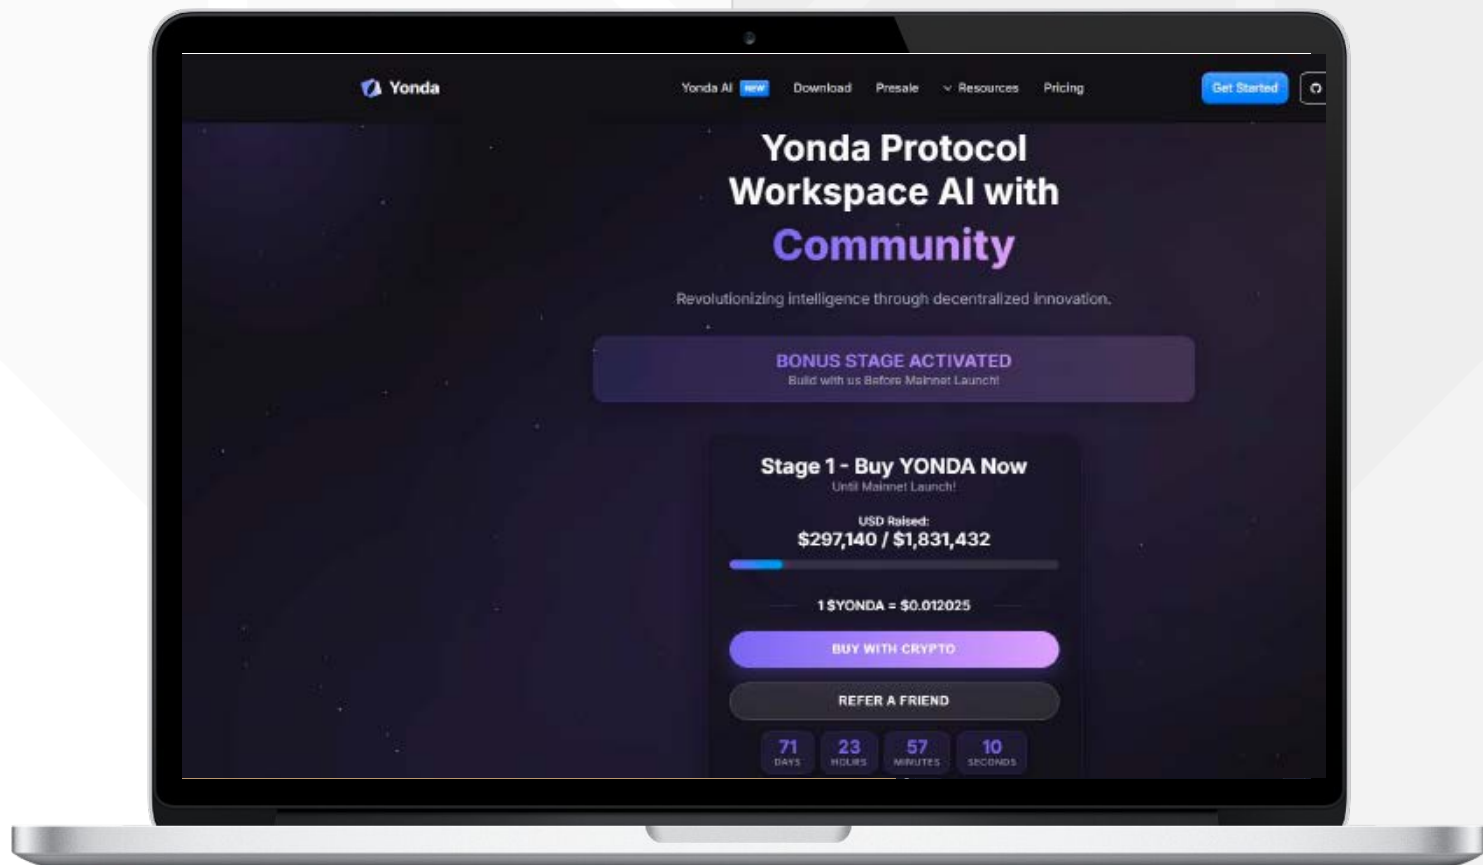

Yes

## Roadmap

Yes

## Mobile-friendly?

Yes

## CRYPTO SECURITY

Audits | KYCs | dApps  
Contract Development

# ABOUT US

We are a growing crypto security agency offering audits, KYCs and consulting services for some of the top names in the crypto industry.

- ✓ OVER 700 SUCCESSFUL CLIENTS
- ✓ MORE THAN 1000 SCAMS EXPOSED
- ✓ MILLIONS SAVED IN POTENTIAL FRAUD
- ✓ PARTNERSHIPS WITH TOP LAUNCHPADS, INFLUENCERS AND CRYPTO PROJECTS
- ✓ CONSTANTLY BUILDING TOOLS TO HELP INVESTORS DO BETTER RESEARCH

# Disclaimer

This report shows findings based on our limited project analysis, following good industry practice from the date of this report, in relation to cybersecurity vulnerabilities and issues in the framework and algorithms based on smart contracts, overall social media and website presence and team transparency details of which are set out in this report. In order to get a full view of our analysis, it is crucial for you to read the full report.

While we have done our best in conducting our analysis and producing this report, it is important to note that you should not rely on this report and cannot claim against us on the basis of what it says or doesn't say, or how we produced it, and it is important for you to conduct your own independent investigations before making any decisions. We go into more detail on this in the disclaimer below – please make sure to read it in full.

## **DISCLAIMER:**

By reading this report or any part of it, you agree to the terms of this disclaimer. If you do not agree to the terms, then please immediately cease reading this report, and delete and destroy any and all copies of this report downloaded and/or printed by you. This report is provided for information purposes only and on a non-reliance basis, and does not constitute investment advice.

No one shall have any right to rely on the report or its contents, and SpyWolf and its affiliates (including holding companies, shareholders, subsidiaries, employees, directors, officers and other representatives) (SpyWolf) owe no duty of care towards you or any other person, nor does SpyWolf make any warranty or representation to any person on the accuracy or completeness of the report.

The report is provided "as is", without any conditions, warranties or other terms of any kind except as set out in this disclaimer, and SpyWolf hereby excludes all representations, warranties, conditions and other terms (including, without limitation, the warranties implied by law of satisfactory quality, fitness for purpose and the use of reasonable care and skill) which, but for this clause, might have effect in relation to the report. Except and only to the extent that it is prohibited by law, SpyWolf hereby excludes all liability and responsibility, and neither you nor any other person shall have any claim against SpyWolf, for any amount or kind of loss or damage that may result to you or any other person (including without limitation, any direct, indirect, special, punitive, consequential or pure economic loss or damages, or any loss of income, profits, goodwill, data, contracts, use of money, or business interruption, and whether in delict, tort (including without limitation negligence), contract, breach of statutory duty, misrepresentation (whether innocent or negligent) or otherwise under any claim of any nature whatsoever in any jurisdiction) in any way arising from or connected with this report and the use, inability to use or the results of use of this report, and any reliance on this report. The analysis of the security is purely based on the smart contracts, website, social media and team.

No applications were reviewed for security. No product code has been reviewed.
